When Angels Die

Coroner

The darkness covers the place we live
The children ask for reasons why
When acid rains burns your skin to shreds
And children die with open eyesDisfigured faces, bleeding disease
Mutilated bodies, sill alive or almost deadTime to realize what they've done to us
It makes no sense to protect yourselfDisfigured faces, bleeding disease
Mutilated bodies, still alive or almost deadChemical holocaust, invisible death
Destruction as far as you can see
[Incomprehensible] die right off
Breathing deep, killing death windsNuclear fall-out, comes down like snow
And the radiation begins to kill
When the whole history of this planet
Seems to be forgottenDisfigured faces, bleeding disease
Mutilated bodies, still alive or almost deadChemical holocaust, invisible death
Destruction as far as you can see
[Incomprehensible] die right off
Breathing deep, killing death windsThe darkness covers the place we live
The children ask for reasons why
When acid rains burns your skin to shreds
And children die with open eyesDisfigured faces, bleeding disease
Mutilated bodies, still alive or almost deadChemical holocaust, invisible death
Destruction as far as you can see
[Incomprehensible] die right off
Breathing deep, killing death winds
