Never Say Goodbye

Red Line Tragedy

Crawl on your knees cause things won't ever be the same and your the reason that they never will again

Crawl on your knees cause things won't ever
be the same and all the pain I've felt so long behind these scars-but you can take away all the pain I've felt so long I've been dead inside here for so long

Fall but it's the last time that I'll ever fall so hard and you're the reason that I ever fell so gone..

Crawl on your knees cause this will never be the same and all the stars that fall so far from what we are-take my breathe away all that's left are just these scars I've been dead inside here for so long

Fall but it's the last time that I'll ever fall so hard and you're the reason that I ever felt so.. Fall
