We Can Leave the World

Sasha

1. When you're feelin' times of trouble, when you're feelin' insecurewhen you're lost inside and have nowhere to turn.
When you look into the future and your writings on the wallit's the fear of falling starring at us all.
And if your world has not turned out to bewhat you planned then come with me.REFRAIN:
We can leave the world behind you never know what we can findtogether we can take the time and make it right
We can leave the world behind whatever you got on your mind
together we can take the time and make it right2. No matter what you're feeling no matter what you needif you believe in love then you'll succeedWe all have our illusions we all have our own dreamsbut there's times when life's just not what it might seem.REFRAINAnd if your world has not turned out to be
watch your plans and open your eyes and you will see
together we can make it right, make it right, make it right, make it right.
REFRAIN:...together we can take the time and make it right
...together we can take the time and make it right
