Life

Kingspade

Life

"Think about it" Everybody has troubles And everybody's troubles are different than others Life's a constant struggle But keep your head high and it'll be alright

Life

Everybody has troubles And everybody's troubles are different than others Life's a constant struggle But keep your head high and it'll be alright

Life

Everybody has troubles Life's a constant struggle

Yo, Step into reality, it's a cold cold world You got to learn to accept it, feels like I've been neglected All these bands coming out and they sound alright All these videos on tv and they look alright I spent my whole life spilling my guts between the lines Putting in more work than you will ever know than when I rhyme Tryin to press the people so I can reach the masses Give them what they want with this pen that's plastic (Life)

I got a message I'm a put it in a bottle Sign the bottom of the paper and let the whole world swallow Today can be tomorrow, ain't no telling when I'm leaving

I'm a rock this microphone even when I'm barely breathin' When you start sleepin, D-loc starts creepin

When you actin a fool, D-loc's always thinking

Be clever when you play me because it's comin back to hull

I can feel my heats rising and it's pissin me off And when it's pissin me off I got no choice

But to crack snap back at you like a chain reaction

I'm gettin older dog you better watch your mouth

You better think before you speak on the mic or get knocked out

It's been a minute and your shit better stop

Bring your punk ass back to Cali, bitch ass get popped You ain't never in Cali, wonder why they don't accept you Your sound's getten flopped, plus you got a fuckin attitude

Life's a constant struggle

I was never really understood, had alot of misunderstandings Not too many saw my plan, so it left me standing in my own two shoes Now what the fuck was I suppose to do?

> Givin a fight, be a man or take my life To make ends meet I did more wrongs than rights Couldn't hold a job, I can't handle being bossed In and out of rehabs, from border schools I was tossed Started hanging with the wrong crowd Caught slanging by my pops and got thrown out On my own once again I had to make it happen That's just a little of my life before I started rappin' But I always kept in touch with my dog Dustin That's the one friend that I never stopped trusting Next thing you know I'm living over at his pad Me and him and Saint we was workin for his dad Drinkin tallboys after work every night Takin hits in the garage out of metal pipes Working long ass hours no 9 to 5 But you gotta do what it takes to survive That's around the time that we met Daddy X And ever since then we've been on a new quest Kottonmouth was formed so it began a new chapter Of my life that I'm livin til I'm in the after after

> > Life

Everybody has troubles And everybody's troubles are different than others Life's a constant struggle But keep your head high and it'll be alright Life

Everybody has troubles And everybody's troubles are different than others Life's a constant struggle But keep your head high and it'll be alright

Life

Everybody has troubles "Think about it" Life's a constant struggle "Think about it" Life

Everybody has troubles "Think about it" "Think about it" "Think about it" Life's a constant struggle But keep your head high

And it'll be alright
"Think about it"
Life
