

# To the Club

## Moonbootica

Look up in the sky feeling kinda high  
You moove it like aerobic I tell you girl I love it  
You like to work your booty to rock your ass a duty  
And we two guys we recognize look better than George Clooney

The people want our sex we got it on our decks  
Black cold is on the table the moon is on the label  
The bootie is the place to make you warp from the base  
You want the dope we got it for you straight in the case

We want to see you freak that's why we push it to a peak  
There's love to rock the rhythm, it's called the moon bootism  
And we got worker honors decide that people are a bonus  
They like your style they like our show 'cause we hit it like Jimmy Connors

Moon boots kick the shit, we size it up a little bit  
When you bang it like a drum with the base and rave the tongue  
But raving is suspected to keep the minds connected  
Love flows love grows if you don't neglect it

Bring your love to the club

Bring your love to the club and rock this shit

This shit rocks
