

# Welcome to Algiers

## Helmet

Somebody pull the trigger  
We are in business now  
We'll make a killing man I don't know why we're hated  
Yeah, we got problems too  
It's only filthy land Another worthless malcontent  
Another savage  
Another day without regret  
And all this damage I don't feel any younger  
I need someone to blame  
I don't know what to wear It's always so confusing  
When lives are being destroyed  
Never been anywhere, nowhere Another worthless malcontent  
Another savage  
Another day without regret  
And all this damage Holy rollers, nobody's convinced  
They're folding up the tents and taking off AD, HD, over medicate  
Nothing's complicated when you're lost  
And we're lost Another worthless malcontent  
Another savage  
Another day without regret  
And all this damage Another worthless malcontent  
Another savage  
Another day without regret  
And all this damage
