Reaction

Dead Letter Circus

You can feel it in the space around you
It's like there's something in the way
That you can't find
And you can't hide
You're only thinking it a day at a time
Somehow you've got to make a change and make it right
So I will try and let you walk away
Stop holding it down
Stop thinking it over
Decide and you'll live your life awake
Your body's the seeker
Emotion will lead you
Provided you live your life awake
I know you feel it in the space around you
It's coming round to make a change for you this time
So you can't hide
You're only thinking this a day at a time
You've only ever walked away so make it right.
I still try and let you walk away
Stop holding it down
Stop thinking it over
Decide and you'll live your life awake
Your body's a seeker
Emotion will lead you
Provided you live your life awake
It's all been in my head

So why don't you live your life today
Suffer reaction
Will you react to me
Over reaction
Got this whole thing underground
I can feel you in every sound
Got your face held up in lights
I see your hand in every little thing
See your mind in every little thing
Your face in line
Not every little thing will go your way
Stop holding it down

Stop thinking it over
Decide and you'll live your life awake
Your body's a seeker
Emotion will lead you
Provided you live your life awake
It's all been in my head
So why don't you live your life today
Suffer reaction
Will you react to me
Over reaction
If I could I would not react to you
If I could I would have no reaction.
