Astro

Neil Finn

You weightless astronaut, you sunset diving bird
You cool wind set upon the branches of a tree
You holding my attention, you are my first impression
And I can recognize the life that I've been givenOne day they will discover you
Low cloud moving cross the sky
One day they will uncover you
Young girl wash the sleep out of your eyesDust on my piano, wool rest never sleeping
All your best one liners borrowed from a film
The thing that gets to me is how you're never free
And how the spirit yearnsYour body is a prison
One day they will discover you
Low cloud moving cross the sky
One day they will uncover youThe thing that gets to me
Is how you're never free
And how the spirit yearns
Your body is a prisonBright as her eyes wide in the night
Why can't you see me?
Come with the wind, time to begin
There'll be no compromiseWhen all you want is wrapped around you
As those saints preserve us when we're dying
To pick us up from where we're lyingOne day they will discover you
One day they will uncover you
Bright as her eyes wide in the night
They will discover you
They will discover you
