## The Leaving Song

## **Bloodsimple**

Sit here all in all
Waiting on the phone
Push my body to the floor
Still you never call
She's still with me
Kiss still kills me
Can't feel guilty

MemoryAll the things you put me through The hopeless nights I tried to make it right for you

It's just a memory

Show me how it is to lose

And who the hell are you to drag me down with youFlowers that I bought are now dead and gone Love that was before is gone evermore

All my hurting, all my yearning, all that burning

Can't you see that it is me

My beautiful All the things you put me through

The hopeless nights I tried to make it right for you

Show me how it is to lose

And who the hell are you to drag me down with you To drag me down with youEvery time I looked in your eyes

Crucified again

Every time you sold me your lies

I was justified in the end

Just like some face lost on a runaway train

Pass me by wave goodbyeAll the things you put me through

The hopeless nights I tried to make it right for you

Show me how it is to lose

And who the hell are you to drag me down with you

To drag me down with you

To drag me down with you

To drag me down with you

To drag me down with you
