

Enjoy It Now

Tortured Soul

Hey you say
You want make it last all day
You say
You don't want this feeling to go away
And feelings that are this good are hard to find
I feel sad that we don't have just a little more time
You know that things are temporary
It won't last you know it
Now is your chance to do it
I wish it was unnecessary
All things and you know it
So enjoy it now
I'll show you how
It won't be long
Before it's gone
Enjoy it too
In september or june
I'll show you how
Just enjoy it now
Why don't you try
You might like what you're missing
Instead of standing there
we could be kissing
Don't wait for next time
next time might be a thousand days
or maybe never
so come on and take a chance and play
Baby don't you wanna try the things you think of
Life is short, don't pass this chance off, it might be love
You know the only thing we have is love
[Life is short you know it]
So enjoy it now
I'll show you how
It won't be long
Before it's gone
Enjoy it too
In september or june
I can show you how
Just enjoy it now
It won't last you know it [2x]
Now's your chance to do it [3x]
So enjoy it now
I'll show you how

'Cause it won't be long
Before it's gone
Enjoy it too
In september or maybe june
in june
I'll show you how
Enjoy it now
