Over and Over

Rachael Yamagata

I really thought I was okay
I really thought I was just fine
But when I woke this time
There was nothing to take me back to sleep
To take you off my mind this timeI keep saying over and over and over and over again
Let it rain, let it rain
Over and over and over and over again
Let it rain, let it rainI need to hide within a storm
So have the lightning come
And bring the winds that scream
And spill the fog all over townAnd hold me in your stand still ground
And I will sink down and you'll be washed away
You'll be washed awayOver and over and over and over again
Let it rain, let it rain
Over and over and over and over again
Let it rain, let it rainI really thought I was okay
I really thought I was just fine
But when I woke up this time
There was nothing to take you off my mindOver and over and over and over again
Let it rain, let it rain
Over and over and over and over again
Let it rain, let it rainI need to hide within a storm
So have the lightning come
And bring the winds that scream
Spill the fog all over townAnd break through every door
And strip away the trees and raise the rivers high
Just help me drownAnd hold me in your stand still ground
And I will sink down and you'll be washed away
You'll be washed away
