## **Disbelief**

## Lifer

Tell me when you've had enough I know I need some Really huh, do you want some of this? Do you wanna try? Do you think that you've had enough? Tell me you're falling in love But I know that you sleep alone Really huh, do you want some of this? Do you wanna cry? You still think you love me I asked you something Since you know everything Can you believe that shit? Can you believe that shit? Tell me you think you are right I know that you are not Really huh, do you want some of this? Do you wanna try?

Do you still think you are right? I asked you something You think, you know everything Can you believe this shit? Can you believe this shit? I asked you a question Since you know everything I don't believe that shit Can you believe that shit? [Incomprehensible]I asked you something You think, you know everything Can you believe this shit? Can you believe this shit? I don't believe that shit Can't you believe your shit? I don't believe your shit I don't believe
