Told You So

Cassadee Pope

You voice is like a ghost inside my head
You whisper lies to try and hurt me again
all the times you doubted me you'll see I was always better than you made me out to beChorus
Not gonna let you down, let you down easy you gonna feel it inside its gonna eat you alive when I walk away walk away the pain will say i told you soTearing off the grip you've had on me time has told me you will never be what i need the ashes from the hell you put me through they will be the memories whats left of me and youChorus
Not gonna let you down, let you down easy you gonna feel it inside its gonna eat you alive when I walk away walk away the pain will say i told you soBridge
All your promises to all my dreams were never meant to be you never believed in me
hiding in your regrets you'll come back wanting me to fall in your arms who do think you areNot gonna let you down easy,no.
When I walk away walk away the pain will say i told you so
I told you so x4
