

How We Operate

Grey`s Anatomy 2

Calm down and get straight
It's in our eyes, it's how we operate
You're true, you are
I'd apologize but it won't go very far
Please, come here
Come right on over
And when we collide
We'll see what gets left over
A little joy, a little sorrow
And a little pride
So we won't have to borrow
Wherever you lead, I'll follow
Turn me inside out and upside down
And try to see things my way
Turn a new page, tear the old one out
I'll try to see things your way
Please, come here
Please, come on over
There is no line
That you can't step right over
Without you, well, I'm left hollow
So can we decide to try a little joy tomorrow?
'Cos baby, tonight I'll follow
Turn me inside out and upside down
And try to see things my way
Turn a new page, tear the old one out
And I'll try to see things your way
The way that we've been speaking now
I swear that we'd be friends, I swear
'Cos all these little deals go down with
Little consequences, we share, we share
Turn me inside out and upside down
And try to see things my ways
Turn a new page, tear the old one out
And I'll try to see things your way
And I'm gonna love you anyway
I'll try to see things your way
I'll try to see things your way
I'll try to see things your way
I'll try to see things your way
