

It Almost All Went Wrong

Face to Face

This uphill battle I've been fighting my whole life
Somehow this melody cuts deeper than their knives
These three chords can win this war
And it's not even a fair fight Forget about yourself for just a while I didn't really feel like singing this song
I've finally made it back where you were all along
It almost ended tragically
It almost all went wrong
I didn't really feel like singing this song If I was afraid to fail I wouldn't even try
I won't be written off
I won't let them decide
For what it's worth
This doesn't work unless you're hanging on these lines Forget about yourself for just a while I didn't really feel
like singing this song
I've finally made it back where you were all along
It almost ended tragically
It almost all went wrong
I didn't really feel like singing this song Do you ever feel
Like we were meant for something better still?
Well maybe not
