

And We Run (feat. Xzibit)

Within Temptation

It burns into your heart
the darkness that you fear.

You were never free
and you never realise
And love, is a word you've never heard.

Your heart aint cold cause it burns
the desire to leave the mind. Take your breath till nothing's left.

Stars of life upon your chest.
And I know wherever you go And we run we don't look behind.

And we run for this killing love
And we run till they haven't to go
And we run and we're never done

And we run till we fall apart
And we run till they haven't to go Don't blink, you'll miss it.

Lift up your head
We gotta get gone.

Yeah, we outta here.
Don't blink, you'll miss it.

Lift up your head.
Too late, we gone

Yeah, we outta here. And we run we don't look behind
And we run for this killing love
And we run far ahead we go I'm a break these chains
Ran through the rain.

Never looked back, never quit
Worked through the pain.

This blood in my veins runs cold when I hate.
Give enough to keep sane but I never lose hope.

This is my time now, no time for tears
Celebrate; put it in the air right now.

Never back down
you'll never wear my crown

cause it weighs too much and I crush every motherfucking thing I touch.

This is love; I've never loved so much.
Get involved make the world stand up.

Here my mic before I ever give up
Name in lights, you lost all my trust.
Now it's time to face all of us.
Get in line Just to call at us

And it feels so marvellous
just take my hand and run. And we run we don't look behind.

And we run for this killing love
And we run till they haven't to go
And we run, and we're never done.

And we run till we fall apart.
And we run till they haven't to go
Don't blink, you'll miss it.

Lift up your head
We gotta get gone.
Yeah, we outta here.
Don't blink, you'll miss it.
Lift up your head.
Too late, we gone

Yeah, we outta here. And we run we don't look behind
And we run for this killing love

And we run far ahead we go
Don't blink, you'll miss it.

Lift up your head
We gotta get gone.
Yeah, we outta here.
Don't blink, you'll miss it.
Lift up your head.
Too late, we gone
Yeah, we outta here.
