

# She's Lost

## Helmet

Can't explain, can't decide  
Can't confirm or deny  
We could talk all night They say you hurt the ones you love  
You love yourself more than anyone  
Honey, do it right True love waits  
Or maybe only suffocates I love the way you work a room  
The way you talk, the way you move  
You were never shy So bored, you watch them feed  
They bite but you don't bleed  
Honey, suck them dry Love and hate  
Anyway you suffocate
