

# Touch

## Suicidal Romance

7 whole days, 7 whole nights  
I can't wait to get you by my side  
    So you can touch me  
    Oh, how I need you so much  
        My body calls out  
        Please, come and touch me  
        Too long since I've had some  
            I need to feel your touch  
            Craving your touch  
        Saving my love for the next time  
            I'm yours, you're mine  
            Baby, we'll be exciting  
        When we meet up that night  
            Two sparks ignite  
            It's funny how a week  
            Seems like eternity  
        I want to feel you near  
            Can you get here?  
        Oh, how I need you so much  
            My body calls out  
            Please, come and touch me  
            Too long since I've had some  
                I need to feel your touch  
                Can't wait 'till we're skin on skin  
                Face to face and heartbeats racing  
                Subway, taxi, airplane or limousine  
                Pick one, oh, anyone  
                Come see about me  
                It's funny how a week  
                Seems like eternity  
  
        I want to feel you near  
            Can you get here?  
        Oh, how I need you so much  
            My body calls out  
            Please, come and touch me  
            Too long since I've had some  
                I need to feel your touch  
                A phone call won't do, no

I need much more than  
Just to hear from you  
Sleeping by myself  
It just ain't cool, no  
My body's aching, baby  
And the cure is you  
Oh, how I need you so much  
My body calls out  
Please, come and touch me  
Too long since I've had some  
I need to feel your touch  
Oh, how I need you so much  
My body calls out  
Please, come and touch me  
Too long since I've had some  
I need to feel your touch  
It's been too long  
It feels like eternity  
I need to feel you, baby  
Come and touch me
