My Girl

Musiq Soulchild

Ooh
Last night you said you wanted to talk to me
And I was at work and you know how my job could be
But then you said that it could wait until later on
'Cause it wasn't really all that important
I guess we could talk when you get home
So you got me thinking about all the things I've done
Wondering if I've did something wrong
But then again, it didn't really sound
As if you were mad, could've been something
You were just afraid to ask me
If there's anything that you want, you need
Don't be afraid to ask, 'cause you're my girl

If there's anything that you want, you need
Don't be afraid to ask, 'cause you're my girl
Girl don't you know my whole world stops for you?
In this relationship, you come first and I come too
And I appreciate how you respect my space
But on the will I'm there for you, anytime or place
You should never stop to wonder where you stand
Cause each and everyday I go and show you
If there's anything that you want, you need
Don't be afraid to ask, 'cause you're my girl
If there's anything that you want, you need
Don't be afraid to ask, 'cause you're my girl
