

# Way To Live

## Small Town Heroes

Haven't felt this good it's like a holiday  
but I don't give a damn 'bout yesterday  
Found this girl in a hideaway  
with soft summer skin with winter ways  
You're Compton bound with imaginary crowns  
and I'm sitting up high not coming downCos' I know looks can kill  
because I'm dying for yours  
This world is large  
but we're going to see it all  
Oh! I've got memories of these moments when  
I was lost in a world that never cared  
Simple times are what we crave  
when we complicate life from a day to day  
Sit yourself back with some time to think  
sniff the roses sip a drinkCos' I know looks can kill  
because I'm dying for yours  
This world is large  
but we're going to see it allNow we're walking through city lights  
with a hand full of trouble I'm feeling like  
I could hold you forever day and night  
for the first time ever I'm living my lifeCos' I know looks can kill  
because I'm dying for yours  
This world is large  
but we're going to see it allSaving me, you're saving me  
when you fall into my arms  
Come fly with me, come soar with me  
No one can bring us down
