

# What Goes Around

Lalah Hathaway

First of all you should know  
That I'm over you it's ok  
But then again I never thought that ill make it to this day  
After everything that we been through  
I finally know the truth

What goes around comes around and will come back to you  
And how you treat your brother man will pay you back in forth  
And for every seed you will sow I just thought that you should know

Life ain't always fair I know but I'm over that it's okay  
But all the goodness and all the grace  
Could not lead me to this day  
And I wish you love and like my friend  
Because I know in the end

What goes around comes around and will come back to you  
And how you treat your sister friend will pay you back in forth  
And for every seed you will sow I just thought that you should know

Call it what you want to  
Put a rose by any other name  
It's still that flower just the same  
Take anything you need to  
But don't make believe that the world is what you see

What goes around comes around and will come back to you  
And how you treat your fellow man will pay you back in forth  
And for every seed you will sow I just thought that you should know

What goes around  
Comes around

And they say what goes up must come down

Call it what want to

What goes around

---
