Every Little Bit of That

Justin Lee

Pretty girls there's something about you
There's something saying i cant live without you
I cant describe how i feel when im with you but all i know is that you take me high
You gotta know that you drive me crazy
The way you song the words to your song
The daisy dukes and botts that you're rockin cant stop thinking about you all day long
Cause its friday night back of my truck sun going down till it comes back up
The smile and the touch and the look i get i wanna get i gotta get every little bit of that
Woah every bit of that
... Punch clock friday
You got me running circles in my mind
All i want all i need is your love cant stop thinking about you if i tried
Cause its friday night back of my truck sun going down till it comes back up
The smile and the touch and the look i get i wanna get i gotta get every little bit of that
Woah every bit of that
Well i think of you when im going to bed
When i wake up i think of you again
So put your bear feet on the dash board singing windows down and your long hair blowing
The smile and the touch and the look i get i wanna get i gotta get every little bit of that
Cause its friday night back of my truck sun going down till it comes back up
The smile and the touch and the look i get i wanna get i gotta get every little bit of that
Woah every bit of that
I want every bit of that
Girl every bit of that
