

Silence

Dry Cell

I believe that I'm hangin' by a string
And I'm feeling so small in a world full of big things
Undone and I'm ready to explode on the thing I don't know
And I just wanna let go Understand that the way that I am
Is a product of a scam that you pull on the last man
Undone and I'm ready to explode on the things
I don't know and I just wanna let go Surprise, my eyes were open
Don't suffocate what's broken
Are you ever done? Are you ever free?
Silence makes me numb without you You believe that you're changing everything
And you're feeling so tall that you can even see me
Undone and I'm ready to explode on the things
I don't know and I just wanna let go Understand that the way that I am
Is a product of a way that you wanna play my hand
Undone and I'm ready to explode on the things
I don't know Surprise, my eyes were open
Don't suffocate what's broken
Are you ever done? Are you ever free?
Silence makes me numb without you
How can this go on? Take it all from me
Silence makes me numb without you I never meant to cause you pain
Fighting aggravation causing suffocation
Never meant to cause you pain
Fighting aggravation causing suffocation
I won't let you Are you ever done? Are you ever free?
Silence makes me numb without you
How can this go on? Take it all from me
Silence makes me numb without you Are you ever done? Are you ever free?
Silence makes me numb without you
How can this go on? Take it all from me
Silence makes me numb without you
Without you, without you, without you
