

# Down Communication

## Edgewater

I thought that you should know  
It's all a fucking fix  
We saw the light tonight  
And you just missed it  
Where's the satellites?  
They burned up in the sky  
And we wait, too late to communicate  
The lines are down  
And all around we're all aroused  
The world's at war at peace  
It's all, it's all so new to me  
And way up in the sky  
The satellites are old but they're bright  
And I believe I can see... I see it!  
I thought that you should know  
It's all a fucking fix  
We saw the light tonight  
And you just missed it  
Where's the satellites?  
They burned up in the sky  
And we wait, too late to communicate

The lines are down and all around  
The files are lost that we sent  
Bleed for this, bleed for this I mean it  
Communicate  
Well it's too late and we said  
Bleed for this  
The year's 2010 the lines are down again  
The year's 2010 the lines are down again  
Here's the answer friend its time to make amends  
The year's 2010 the lines are down again  
So quiet  
Just quiet  
So quiet  
Too quiet!!  
I thought that you should know  
It's all a fucking fix  
We saw the light tonight

And you just missed it  
Where's the satellites?  
They burned up in the sky  
And we wait, too late to communicate
