

# Leave It

## Bombay Bicycle Club

Don't think it's what you're afraid of  
come in you know what's been made up  
Hold you tight, words have a new sound  
reading the signs that just seep out

You've got to leave it  
"Don't you go evade me now  
Come see what you've done"

Each of your reasons has broken  
call it off once you have spoken  
Filled to the top then split open  
repeating over and over  
Now you have to leave it  
"Don't you go evade me now  
Come see what you've done  
I've been thinking lately how  
all these feelings won"
