

Know It Too Well

The Motet

There's nothing I can say to change you
You made your mind up long befo'
Don't matter what comes up its steady going down
Holding on when we should just let goWe keep on talking, about the things we're doing
I see you stressing, about the way it's moving
I hear you cussing, you got fire in your veins
We keep on trying, but it's far from the same(We) Know it too wellWe did it dirty, now it's far from clean
But we can't mend a broken dream
Lost and sinking but not knowing when to bail
When there ain't no wind that's filling up our sailWe keep on talking, about the things we're doing
I see you stressing, about the way it's moving
I hear you cussing, you got fire in your veins
We keep on trying, but it's far from the same(We) Know it too wellWhat can we do with all this mess?
And what's the use of all this stress?
Uncertain of tomorrow & clutching to the past
But not everything is meant to last
