

Everything Is Possible

[Jonathan Jackson + Enation](#)

From my knees I rise to dream
From the inside out I sing
Elevate my soul with a kiss
So I can live in love and echo the bliss
I wake up everyday and feel brand new, love
Everything is possible with you, love We've been burning money like gasoline
Trying to take us to the next dream
'Cause what is time but a curse to be lifted?
What is death but a new life to be gifted? I wake up everyday and feel brand new, love
Everything is possible with you, love You and me are going to take on the night
You and me are going to burn out the lights
'Cause I don't got time to waste my life
I've got one life to live and I'm going to live it right
