Mankind

Cast

When you start to find, start to see the signs
Read between the lines
Then you start to learn, wheels start to turn
Fire burnsTried to show you but you could not see me
Tried to tell you but you could not hear me, no
So I just let goThen you realize all can't be defined
The questions in your mind
Then you open wide and see what's yet to come
Now it's only just begunTried to signal but you do not receive me
Tried the truth but you will not believe me, no
So I just let go'Cause I can see the things I need to see
Come alive with energy
And I'm a big believer in mankind
Watch the world revolving, through my eyes
Watch the world evolving in my mindWhen you start to learn, wheels start to turn
The fire burns
Then you open wide, see what's yet to come
And now it's only just begunTried to touch but I could not reach you
You hear the prayer but will you be preached to, no?
Watch the world revolving through my eyes
See the world evolving in my mindAnd the world turns round and round
To the music and the sound
Hear the world responding to our cry
