

# Biochemistry

## Eleanor McEvoy

Yes it's okay, no, I don't mind  
But take it slow 'cause I take time to unwind  
And if you're nervous, well that's okay, hey  
So am I, so am I, so am I No, I don't mind and to be precise  
If you did well, it would be kind of nice  
So let that sparkle overflow, oh  
Don't be shy, don't be shy, oh, don't be shy Well, put it down to my biochemistry  
Put it down to the way I love champagne  
Put it down to compatibility  
And put your lips to mine again  
Well, put your lips to mine again No, I don't mind and I'd like to say  
I love the fact that first you asked anyway  
So slide on over here to me, hey  
Make me smile, make me smile, oh, make me smile Put it down to my biochemistry  
Put it down to the way I love champagne  
Put it down to compatibility  
Put your lips to mine again Put it down to my biochemistry  
Put it down to the way I hate the rain  
Put it down to compatibility  
And put your lips to mine again  
Oh, put your lips to mine again Yes, it's okay, really, it's fine  
Gentle shivers rolling down my spine  
Have me feeling to my toes, oh  
Satisfied, satisfied, oh, satisfied Put it down to my biochemistry  
Put it down to the way I love champagne  
Put it down to compatibility  
And put your lips to mine again Put it down to my biochemistry  
Put it down to the way I hate the rain  
Put it down to compatibility  
And put your lips to mine again Put it down to my biochemistry  
Put it down to the way I love champagne  
Put it down to compatibility  
And put those lips to mine again  
Put it down to my biochemistry
