You're Always Pulling Me Down

Ub40

I thought I knew you well, your right and wrong
Thought I could steal your secrets, put them in a song
I thought that you'll be waiting patiently for me
That only I could see
You build me up and tell me lies
You hold my hand, say close your eyes
You will
You're always pulling me down
You make me lower my expectations
You're always pulling me down
Why do you complicate situations?
You're always pulling me down
I don't know what else to do
I'm still in love with you
I wish that I could see things through your eyes
I want to lift the veil, penetrate your lies
I want to take your truth and hold it in my hand
Maybe then I'll understand
You contradict in a thousand ways
You call the tune and guess who pays
Who will
You're always pulling me down
You make me lower my expectations

You're always pulling me down
Why do you complicate situations?
You're always pulling me down
I don't know what else to do
I'm still in love with you
I wish that I could see things through your eyes
I want to lift the veil, penetrate your lies
I want to take your truth and hold it in my hand
Maybe then I'll understand
You contradict in a thousand ways
You call the tune and guess who pays
Who will
You're always pulling me down
You make me lower my expectations
You're always pulling me down

Why do you complicate situations?
You're always pulling me down
I don't know what else to do
I'm still in love with you
Still in love with you
Still in love with you
Still in love with you
