Never Live Without You

Adam Brand

Well I've never loved another like I love you
You taught this cheating heart to stay at home
And now I know that I could never live without you
If I ever thought I could I was wrongMy heart was bleeding and my pride was all bruised
I threw caution to the wind, I had nothing left to lose
My days of running wild and no one to care for
I've left them all way behind and now
I'm knocking on your front doorMy friends keep telling me that it'll never last
This crazy lovin' feeling, soon it's gonna pass
But day by day it's getting stronger than before
Everytime I kiss your lips I keep coming on back for so much more
