

The World Is Ours

Volunteer

We've shared dreams under open skies
We've loved far and we've traveled wide
But the best is yet to come We danced out late in the pouring rain
Never lost hope, never lost the flame
And the best is yet to come We've waited long enough by now
We've got a sing and we should sing it out There's a spark in you and a spark in me
So get up, get up, let's take the lead
You shine bright like a million stars
So light up, light up, the world is ours
The world is ours
We climbed mountains and we took the leap
Had our hearts broken and it cut so deep
But the best is yet to come We've waited long enough by now
We've got a song, it's time to sing it loud
There's a spark in you and a spark in me
So get up, get up, let's take the lead
You shine bright like a million stars
So light up, light up, the world is ours
The world is ours The world is ours
The world is ours
The world is ours
