Machine Girl

LAB

Machine girl she really tried but years went rushing by
She wished to stop but never had the timeMachine girl - she tried to say but not a sound came out
Ahe always wished her luck would come aroundAnd soon she won't feel a thing
And really soon she won't feel a thingMachine girl, she really tried but never had the time
To stop to think things over and decide
To read those thoughts of hers, make up her mind
