

Social Enemies

Orgy

Social weapons that miss
Pretend them to save
Cowards, bastards to shame
Condemned social slaves
Here to save the freaks again you think
And I bet you always will Here to save the freaks, again you think
Here to save the freaks
Here to save the freaks, again you think
Here to save the freaks Snakes causing the fate
Sadistic and free, so free
And traders, defendants behave
Lies stay away, from me
And saints keep knocking
Go home, don't sell me Mary
No, no, making the crazies well inside you think
And I bet you always will Calling us no good, you are the social enemies
(Change)
We change the people, day to day
Making us no good, you are the social enemies
(Change)
Changing the people, day to day Agitators talking the show
Messing with heads, to be the number one
Smash us, no matter their God'll help
Proud of yourselves, aren't you?
Making the crazies well inside you think
And I bet you always will Calling us no good, you are the social enemies
(Change)
We change the people, day to day
Making us no good, you are the social enemies
(Change)
We change the people, day to day Calling us no good, you are the social enemies
(Change)
We change the people, day to day
Making us no good, you are the social enemies
(Change)
Changing the people, day to day Why must we play, the bitter me?
I'm suffering now,
The nowhere me
Stop trying to say

You fell into this place
So tragic you found
The nowhere me Here to save the freaks, again you think
Here to save the freaks
(Nowhere me)
Here to save the freaks, again you think
Here to save the freaks
(Nowhere me)
Here to save the freaks, again you think
Here to save the freaks
(Nowhere me) Here to save the freaks, again you think
Here to save the freaks
Here to save the freaks, again you think
Here to save the freaks
Here to save the freaks, again you think
Here to save the freaks
Here to save the freaks, again you think
Here to save the freaks
