

# Tell All Your Friends

## Feeder

Staring out to reach a star  
Contemplating life on mars  
Life's a cover magazine  
I'm an eggshell under feet Till I see this house under pale blue skies  
With golden fields that will burn your eyes  
So let's take a drive underneath the sun New intentions all around  
Put the brakes on, slow it down  
Trying to find a new release  
Find a space that you can breath But I've seen a house under pale blue skies  
With golden fields that will burn your eyes  
So let's take a drive underneath the sun  
But don't come around, pulling me down Telling the world  
How I let you down  
Just tell all your friends  
I wanna dream with you So tell all your friends and neighbors too  
CNN BBC, World News  
Tell all your friends  
I wanna dream with you Tell all your friends  
Tell all your friends  
Tell all your friends I don't wanna sit here catching flies  
'Cause I have seen this house under pale blue skies  
With golden fields that will burn your eyes  
So let's take a drive underneath the sun But don't come around, pulling me down  
Telling the world how I let you down  
Just tell all your friends  
I wanna dream with you So tell all your friends and neighbors too  
CNN BBC, World News  
Tell all your friends  
I wanna dream with you Tell all your friends
