

Medicinal Reality

From First to Last

This is your day with a whole world to face
What is your price to appease?
You can march to the beat that puts us to sleep
Medicinal reality All my life I've been searching for
Hope to find something more than just
Pawns in just a chess game, blood stained names
Just fall in line, fall in line Can you feel the weight of two decades to date?
All crashing down on you now
You can march to the beat that puts us to sleep
Medicinal reality All my life I've been searching for
Hope to find something more than just
Pawns in just a chess game, blood stained names
Just fall in line, fall in line Free from the womb with only a name
Make something of yourself before you're made a slave
'Cause life will not wait, no, life will not wait
The sun's gonna rise either way March to the beat that puts us to sleep
Medicinal reality All my life I've been searching for
Hope to find something more than just
Pawns in just a chess game, blood stained names
Just fall in line, fall in line All my life I've been searching for
Hope to find something more than just
Pawns in just a chess game, blood stained names
Just fall in line, fall in line
