Get Away

CHVRCHES

I can only see you when I close my eyes
There's nothing left of you here
We had the time, we had the time

The things that I remember I do not regret
They don't mean a thing here
We had the time, we had the time

I'll be your guide So you can see the other side Then I will never let you get away Never let you get away

I'll hold you hands so you can see Crossing your heart and hoping To never let you get away Never let you get away

Everything you prayed for is not overhead No one else will save you Wake up your mind Wake up your mind

Trust me when I tell you
We are on our own
Overlap your fingers
And run through the pines
We'll run through the pines

I'll be your guide So you can see the other side Then I will never let you get away Never let you get away

I'll hold you hands so you can see Crossing your heart and hoping To never let you get away Never let you get away

I'll be your guide

So you can see the other side Then I will never let you get away Never let you get away

I'll hold you hands so you can see Crossing your heart and hoping To never let you get away Never let you get away

> Never let you get away Never let you get away Never let you get away Never let you get away

> > ---
