## I Thought There Was Time

## **Blake Shelton**

I knew something was the matter
It really needed my attention
And I had planned to look into it, somedayBut I was busy making money
I wanted you to be proud of me

Now I wish I could turn the clock back, somewayI thought there was timeI never thought that you would leave

me

I always thought that I could find you

Somewhere near a phone to answer, when I callNow you have my full attention

Now you're all that I can think of

This is not what I expected at allI thought there was time

I thought there was timeAre you even on this planet

Can you see these pretty flowers

Or am I standing here just talking to the windHow I wish that I had told you

How I wish that I had shouted

I love you, I love you, I love you, I love you back thenI thought there was time

I thought there was time I thought there was time I thought there was time
