

# Lights Out

## Next

Baby, I can't sleep  
Can you tell me a lullaby?  
A lullaby  
Excuse me, sister, what's up with ya?  
Let me holler at ya, try to paint a picture  
Of you and I, champagne in ice  
Little candle light to set the mood right  
Can you picture that, get ya hat  
And get ya coat 'cause we can roll  
Back to my spot I'm in the parking lot  
Come on let's drop the top, cool you off  
'Cause girl you're so fine  
Your body is so, I gotta get you  
I want you so bad right now  
Can't wait to be alone  
And have you in my room  
So I can turn the lights out on you  
Your body is so, I gotta get you  
I want you so bad right now  
Can't wait to be alone  
And have you in my room  
So I can turn the lights out on you  
Excuse me, mami, you here with somebody?  
I know you are probably 'cause you're such a hottie  
There's a private party back at my place  
No one's there, let's get outta here  
I got the G5 outside, valet ready to drive  
Just say the words and we can ride  
We can take 35, W, 494  
Turn right on Candlewood and we're right in the door  
'Cause  
Your body is so, I gotta get you  
I want you so bad right now  
Can't wait to be alone  
And have you in my room  
So I can turn the lights out on you  
Your body is so, I gotta get you  
I want you so bad right now  
Can't wait to be alone

And have you in my room  
So I can turn the lights out on you  
I can't describe in words  
How much I love your curves  
This is it, come out of this  
Come here, let's kiss and hit the switch  
Right now  
Your body is so, I gotta get you  
I want you so bad right now  
Can't wait to be alone  
And have you in my room  
So I can turn the lights out on you  
Your body is so, I gotta get you  
I want you so bad right now  
Can't wait to be alone  
And have you in my room  
So I can turn the lights out on you  
Your body is so, I gotta get you  
I want you so bad right now  
Can't wait to be alone  
And have you in my room  
So I can turn the lights out on you
