

Out of Reach

Shallow Side

It's so calm around us as everything just fades
All the storms surround us but nothing seems to change
Whoa ohh ohh
Nothing seems to change
Whoa ohh ohh I don't wanna lose you forever
I just want you right here by me
Where we could always stay here together
But we both know that's out of reach To live in the moment
Is like a star that never fades
This chance in an ocean
I don't wanna drift away without you
I have this fear of standing alone
I keep it locked inside me
I know your better on your own I don't wanna lose you forever
I just want you right here by me
Where we could always stay here together
But we both know that's out of reach
And I'm out of reach but tonight
Tonight I will lend out my hand
If you'll take that from me
Because when time comes
I know that I can't stand
No, not around to wait and see
