Drive South

Kelly Willis

(John Hiatt)I didn't say we wouldn't hurt anyone
That's how you learn, you just get burned
But, we don't have to feel like dirt anymore
Though love's not earned baby, it's our turnWe were always looking for true north
With our heads in the clouds, just a little off course
I left the motor running
Now, if you're feeling down and outChorus
Come on baby, drive south
With the one you love
Come on baby, drive south
With the one you loveI'm not talkin' 'bout retreatin', not this girl
Gonna take our stand, in this Chevy van
Windows open on the rest of the world
Holdin' hands on the way to DixielandWe've been tryin' to turn our lives around
Since we were little kids
It's been wearin' us down
Don't turn away now, darlin'
Let's fire it up and wind it outChorusI heard your mama callin', I think she was stallin'
Don't know who she was talkin' to baby, me and youWe could go down with a smile on
I ain't gonna pack my nylons,
Got to leave our legs showin'
It gets hot where we're goin'We were always looking for true north
With our heads in the clouds, just a little off course
I left the motor running
Now, if you're feeling down and outChorus
