The Foster Triplets

Close your eyes and let your mind,take a journey back in time to a lonely hill and an old rugged tree see a man there so abused cruelly beaten, his body bruised and blood streaming from his hands and feet
A solder held the hammer but we all nailed him there even though it was our cross Jesus chose to bear

Chorus

Picture this love on display
A portrait of grace who could comprehend why he would take our sin and die to pay redemption price we're overwhelmed by mercy when our hearts catch a glimpse picture this

Oh, watch them mock his holy name and marvel as you hear him say father please forgive for they know not what they do
look upon his battered face the evidence of my disgrace revealed there for all the world to view
Lest we take for granted how much he sacrificed let us always keep that scene right before our eyes

Chorus

When we try to imagine the kind of compassion that led him to that place we stand amazed

Chorus
