

Disaster (2018)

JoJo

I'm trying not to pretend that it wont happen again, and again like that

...

Never thought it would end, cuz you got up in my head, in my head like that

You made me happy baby, love is crazy, so amazing

...

But it's changing, rearranging

I don't think I can take anymore

Cuz the walls burned up and our love fell downAnd it turned into whatever, now we're saying never

Feel the fire cuz it's all around and it's burning

For forever and always

We gotta let it go, be on our way

Live for another day, cuz it ain't the same, my baby

Watch it all fallin to the ground

No happy ever after, just disaster

...

I didn't want it this way, I only wanted to say

I loved you right

But now you walkin away, and leavin me here to stay

So foolish of me to wait for you to realize

All the things I gave you, made you, change you

Your dreams came true

When I met you, now forget you

Don't want anymore

Cuz the walls burned up and our love fell down

And it turned into whatever, now we're saying neverFeel the fire cuz it's all around and it's burning

For forever and always

We gotta let it go, be on our way

Live for another day, cuz it ain't the same, my baby

Watch it all fallin to the ground

No happy ever after, just disaster

You shot the bullet, you shot the bullet that killed me

Not feeling my heart beat, and I was dyin

I I've been through it, I I've been through the agony

And now my eyes are, dryin, tryin, no more cryin

...

Lyin's just a game

So disaster strikes and I'm all right

Cuz my loves on his way

...

Yeah

Burning for forever and always

...

Cuz the walls burned up and our love fell down

And it turned into whatever, now we're saying never
Feel the fire cuz it's all around and it's burning
For forever
and always

We gotta let it go, be on our way

Live for another day, cuz it ain't the same, my baby

Watch it all fallin to the ground

No happy ever after, just disaster

The walls burned up and our love fell down

And it turned into whatever, now we're saying never

Feel the fire cuz it's all around and it's burning

For forever and always

We gotta let it go, be on our way
Live for another day, cuz it ain't the same, my baby

Watch it all fallin to the ground

No happy ever after, just disaster

Just disaster

Oh whoa! Burnin for forever and always

Always, yeah

...
