

# Be Still

Todd Smith

It's so loud  
I just can't seem to slow this down  
I need You more than ever now  
Let the silence be the only sound Your glory  
Becomes the only thing I see  
Your beauty brings me to my knees  
The awe that You inspire in me Makes me wanna be still  
So still You can hear me breathing in  
So still You can hear me breathing out  
Let Your calm descend upon me now So now  
I stand before You broken down  
My feet upon this holy ground  
I can feel Your presence all around  
Makes me wanna be still  
So still You can hear me breathing in  
So still You can hear me breathing out  
Let Your calm descend upon me now I hear You whisper softly  
I hear You speaking to me  
I hear you, in the silence You call my name I wanna be still  
So still You can hear me breathing in  
So still You can hear me breathing out  
Let Your calm descend upon me now  
I wanna be still  
So still You can hear me breathing in  
So still You can hear me breathing out  
Let Your calm descend upon me now  
I wanna be still  
So still You can hear me breathing in  
So still You can hear me breathing out  
Let Your calm descend upon me now  
I wanna be still  
I wanna be still  
I wanna be still  
Be still
