

IX. Enter the Exosphere

Pivot

Hello anyone? Is this getting through? We have been at it for so long. This is for any who are listening.
I can see the lights blinking. Is there a runway? This is Pivot calling earth. Can you hear us approaching? Its not
a mayday we are coming into land.

For those in control, we found our own way down. Know that your opinion makes no difference.
I can see the lights blinking. Is there a runway? This is Pivot calling earth. Can you hear us approaching? Its not
a mayday we are coming into land.

We found our own way down. Next time those who listened may come with us.
I can see the lights blinking. Is there a runway? This is Pivot calling earth. Can you hear us approaching? Its not
a mayday we are coming into land.
