

Dream City

XP Voodoo

Jane was an actress, now she's a waitress
Steve's at the cafe parking cars
A year or two back they were going places
Now they're just staying where they are
One night in dream city
You need more, you want fun
One night in dream city
Hot town, warm gun
One night in dream city
Your troubles ended?
No, they've just begun
No, they've just begun
Is it the world that wants an audition?
Is it the world that wants a job?
Lean on a corner called ambition
Wait for whatever comes along
One night in dream city
You need more, you want fun
One night in dream city
Hot town, warm gun
One night in dream city
The bright lights, the big wheel
One night in dream city
It's unkind, it's unreal
One night in dream city
You need more, you want fun
One night in dream city
Hot town, warm gun
One night in dream city
Your troubles ended?
No, they've just begun
Your troubles ended?
No, they've just begun
