

Law and Order

Stiff Little Fingers

Everybody's down in the center of town
We're doing nothing wrong we're only hanging around
And they put you up against the wall Make loud mouth jokes just to make you feel small
Laugh at your appearance and the clothes you wear
Call that justice, just isn't fair I'm talking 'bout their law and order
They don't do what they ought to
Law and order
There's no justice in it, none I had a friend who was lifted by the law
Lifted and then shifted and dumped on the floor
They treated him like shit Kicked him in the head and then laughed when he bled
Spat in his face and pulled his hair
Call that justice, just isn't fair I'm talking 'bout their law and order
They don't do what they ought to
Law and order
There's no justice in it, none I'm not trying to say we're always right
No one's saying that it's black and white
All I'm saying is we don't agree
I don't think like, you don't think like me, I hope you never do Yes And that's the way they try and run this land
How they hold you down and keep you in hand
You're just a pawn in their game You're just another number, you ain't got a name
You just a little punk y'know they don't care
Call that justice, just isn't fair I'm talking 'bout their law and order
They don't do what they ought to
Law and order
There's no justice in it Law and order
They don't do what they ought to
Law and order
There's no justice in it Law and order
They don't do what they ought to
Law and order
There's no justice in it, none
They're justice's all gone, it's all gone
