Cool Cool Universe

Ima Robot

Every time they bomb a baby, I go insane
Breathe it off but dont feel the pain
Start thinkin to start drinkin, numb yourself to kill the brain
But I still got pain, I cant stop the rainF*** that, what about the thriving?
But it's hard to be alive
When everybodys just jivin
All eyes on meIm gonna set the truth free
ContradictionsCause its a cool, cool, cool, cool universe
And all the wonderful things just make it worse
Ive gotta owe, owe, owe, owe, owe it first
Youre such a cool, cool, cool, cool universeEvery time they tell me to vote I lose my hope
You could represent me? Now thats a joke
Start rootin for some shootin, no solution for whats broke
But I still got hope, I cant shake the hopeDont give me the lies
Man, I know theres no rhyme or reason
Still everybodys schemin
To prove they know the meaning of this big messWell, Im not impressed
DisillusionedCause it's a cool, cool, cool, cool universe
And all the wonderful things just make it worse
Ive gotta owe, owe, owe, owe, owe it first
Youre such a cool, cool, cool, cool universeAnd it's a cool, cool, cool, cool universe
And all the wonderful things just make it worse
Ive gotta owe, owe, owe, owe, owe it first
Youre such a cool, cool, cool, cool universeOh, ow, stop it hurts, pretty things make it worse
Soon I'ma hit the dirt so unfair, such despair
Poetry, beauty, desperation of love
Im talkin bout romance, slow dance, cant get enoughIve climbed all the highest mountains
Ive done every drug in reach
Ive made love to pretty women
While the sun set on the beachBut no good time goes unmourned
No good heart goes untorn
Good or bad, its all sad
And my acceptance is bornCause it's a cool, cool, cool, cool universe
And all the wonderful things just make it worse
Ive gotta owe, owe, owe, owe, owe it first
Youre such a cool, cool, cool, cool universeAnd it's a cool, cool, cool, cool universe
And all the wonderful things just make it worse
Ive gotta owe, owe, owe, owe, owe it first
Youre such a cool, cool, cool, cool universeBreak my heart
