

In Orbit

Tom Principato

All that I'm seeing around me
Bright shining stars that abound me
Suddenly out of control
Rather it catches my soul
Don't know what's up or down
Somehow I feel like the clown
Maybe someday I will wake up
To find that it's all really made up
Going in orbit with you
Oh yeah, that's all that I do
Going around to the light side

Going around to the dark side
Behind me a gray big nothing
I think that we really had something
I don't have to fear a black hole
Out here I'm sure of my role
All that I am is weightless
All that I see is timeless
Going in orbit with you
Oh yeah, that's all that I do
Going around and around
I'm going in orbit with you
