A Thousand Miles Away

Ultraviolent

This road I'm on is endless
My heart can never get a break
And sometimes life seems so senseless
I'm not sure how much I can take
And no matter how far I am
Or how far apart we are
Please know you'll be my everything
You're always in my heart

And you're a thousand miles away
So much I need to say
Even though these miles can't keep us apart
And you're a thousand miles away
So much I need to say
And even though you're so far
My heart is with me to stay

Will you have open arms
Once I finally get home again
You tell me that you love me
And you'd be mine 'till the end
Can we close this gap, can we make it all come true
Can we close these miles, baby me and you
